

BATTERY FILTER

PURFLUX LAUNCHES ITS BRAND-NEW RANGE: BATTERY FILTERS FOR TOYOTA AND LEXUS HYBRID VEHICLES

NEW

THE ROLE OF THE BATTERY FILTER

The **battery filter** protects the high-voltage battery's ventilation system from dust and other impurities, ensuring optimal cooling. A clogged filter can lead to overheating, reduced performance, or failures (fault codes P0A82 and P0A80).

ITS ADVANTAGES

Simple and quick installation Perfectly suited for routine maintenance operations

An underexploited market with strong commercial development potential

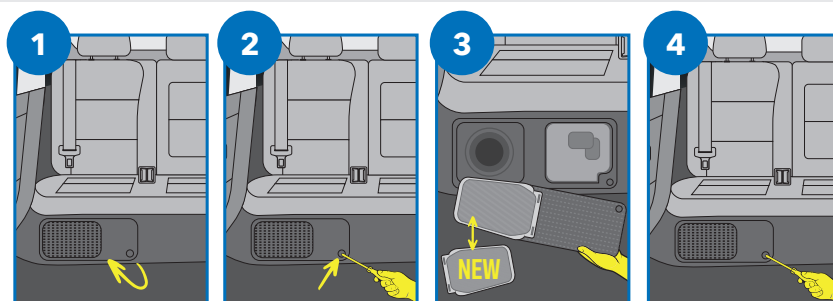

Complete range of PURFLUX filtration solutions

Limited offering in the aftermarket

Integrated into Toyota & Lexus maintenance program

MAINTENANCE

To ensure optimal maintenance, it is recommended to follow the manufacturer's guidelines by replacing this filter every 18 600 miles* or every 2 years and checking it at least every 9 300 miles** or once a year.

Regularly changing your battery filter prevents fan clogging and costly long-term repairs!

*30 000 km • **15 000 km

PURFLUX GROUP

BATTERY FILTER

WHY MAINLY TOYOTA AND LEXUS?

Some manufacturers have chosen forced-air cooling for the batteries in their hybrid vehicles. Ambient air is drawn in through ducts to cool the battery, leading to the accumulation of dust and dirt. The filter helps maintain optimal airflow.

The integration of a battery filter is an engineering decision specific to Toyota and Lexus, linked to their cooling system and their goal of improving the reliability of their hybrid vehicles.

**PURFLUX LAUNCHES ITS FIRST 4 REFERENCES,
COVERING 52% OF THE EUROPEAN CAR FLEET!**

Today, more than 3 million vehicles on European roads are equipped with a battery filter.
